

Annexe 2 : Recherche bibliographique

Compte tenu de l'ampleur du sujet et de l'abondance de la littérature, la recherche bibliographique s'est focalisée sur les données les plus récentes (2016-2020). Seules les méta-analyses et les revues systématiques ont été recherchées sur une période plus large (2014-2020).

Bases interrogées

Medline-PubMed, Web of sciences, Psycinfo, Scopus, Cochrane, Cairn, Socindex et Banque de données en santé publique (BDSP).

Principaux sites interrogés

Observatoire Français des Drogues et des Toxicomanies (OFDT), Observatoire Européen des Drogues et des Toxicomanies (OEDT), Mission Interministérielle de Lutte contre les Drogues et les Conduites Addictives (MILDECA), Santé publique France (SPF), Société Française d'Alcoologie (SFA), OMS Europe (Organisation Mondiale de la Santé), Alcohol research UK, Reducing Alcohol Related Harm (RARHA), National Institute for Health and Care Excellence (NICE), Centers for Disease Control and Prevention (CDC), National Institute on Alcohol Abuse and Alcoholism (NIAA).

Principaux mots-clés utilisés

En fonction des bases utilisées, la stratégie de recherche a été réalisée soit avec les mots du thésaurus ou de l'index des bases interrogées, soit en mots du texte (Titre, Abstract). **Les séquences entre les guillemets indiquent une suite de mots recherchée *in extenso* et le symbole * indique les mots-clés utilisés avec une troncature.**
